DETAILED ACTION

This Office Action is in response to the preliminary amendment filed on January 15, 2004.

Accordingly, claims 1-24 were cancelled, and new claims 25-45 were added.

Currently, claims 25-45 are pending in this application.

Priority

This application is a CONTINUATION of application No. 09/736,157 filed December 15, 2000, now U.S. Patent No. 6,803,322.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: METHOD FOR FORMING PIN ALLOY-SEMICONDUCTOR DEVICES WITH RECTIFYING JUNCTION CONTACTS.

Claim Objections

Claims 26-30 are objected to because of the following informalities: line 1, "the alloy semiconductor comprises" should be --the alloy-semiconductors comprise--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 recites the limitations "the alloy material" in line 3 and "the alloy" in line 4.

There is insufficient antecedent basis for these limitations in the claim. It is suggested that these limitations be substituted with --the alloy-semiconductors-- for constancy.

Claims 26-30 are rejected as depending on the rejected base claim(s).

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 25-45 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-21 of prior U.S. Patent No. 6,803,322. This is a double patenting rejection.

Art Unit: 2822

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mlcak et al. (US 5,338,416) and Kohl et al. (US 4,369,099) disclose relevant teachings regarding photo-electrochemical etching of semiconductors. Meyers et al. (US 4,710,589) disclose the use of alloy semiconductor comprising a combination of Group II and VI element for PIN related products.
